Office Action Summary	Application No. 10/005,083	Applicant(s) SCHWANDNER, FRANK	
	Examiner Ahshik Kim	Art Unit 2876	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 01/30/04 (Response).
- 2a) This action is **FINAL**.
- 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Amendment

1. Receipt is acknowledged of the amendment filed on January 30, 2004. In the
5 amendment, without amending any claims, Applicant traversed the rejection made in previous
Office Action. Currently, claims 1-20 remain for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the
10 basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- 15 (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-9, 16-18, and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by
Rensel (US 6,036,179, “Rensel” hereinafter).

Rensel teaches a data system (see figure 6) comprising an elastomeric product 22 having
20 a receiving portion for radio frequency device 27 (col. 4, lines 37+; col. 4, lines 63+). As shown in figure 5, the transponder is further comprised of a microchip 33, a battery 28, and antenna 36 for communicating with a hand held unit 54A.

Allowable Subject Matter

Art Unit: 2876

4. Claims 10-15 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5 5. The following is a statement of reasons for the indication of allowable subject matter: the claims are directed at a transponder moveably implanted into a pocket on a spindle sleeve. As disclosed in the reference to Aslam, and previously cited references to Epstein and Kleinfelter, a data system comprising an elastomeric product is well known in the art. However, the references, taken alone or in combination, fail to suggest or teach a particular structure wherein
10 the sleeve comprises a sealable pocket and a toothed profile as set forth in the claims.

Response to Arguments

6. Applicant's amended claims and remarks filed on January 30 have been carefully reviewed and considered. Although most of radio frequency tag is comprised of a processor, and
15 power source and an antenna for communication, perhaps the newly cited references to Rensel shows the structure of the transponder in clearer manner. It is the Examiner's view that the embodiment disclosed in the Aslam patent very well may have similar transponder structure. Examiner also notes that the Applicants did not amend the claims to warrant new search or consideration. Accordingly, this Office Action is made non-final.
